# Proposal

## Proposal Information

---

**Scientific Summary**

Structured scientific summary for scientific assessors. Please include: important background, hypothesis, and expected outcomes

---

**Background**

Provide context for the application, including research in the field and by the applicants.

---

**Aims of the Project**

Please list the aims of the project, including any specific hypotheses to be tested.

---

**Experimental Plan and Methods**

Using your aims to structure your response, please provide sufficient detail that experimental protocols can be assessed for suitability and likelihood of success. Please provide details of preliminary data and specify both materials and methods, source/cohort/recruitment plan, and analysis methods/statistics. Only details for routine experiments such as Western blots, PCR etc. should be excluded. Please save detailed power calculations, including numbers for experiments involving animals/human volunteers, for the following question.

# Proposal

## Proposal Information

---

### Power Calculations

Please include power calculations for animal or clinical studies. These should be referenced in the cost justification.

---

### Translation

Please state how you think the proposed research plans will contribute to a forward translational path, and expand the area of study in the following ways:

- i. Generating new knowledge
- ii. Translating research ideas into new products and services
- iii. Creating evidence that will influence policy or other stakeholders
- iv. Developing the human capacity to do research
- v. Stimulating further research via new funding or partnerships

---

### References

Vancouver reference styling is preferred. Please list the references, including article titles, that have been cited in the previous section. Where appropriate, cite key papers rather than attempt to be comprehensive.
