

**Position: 2 year post-doctoral position
(Can be renewed)
Field: Immunology
Place: CRCL, Lyon, France**

- The laboratory of Dr Julien C. Marie is seeking an **experienced, creative and autonomous post-doctoral fellow** to study the effects of TGF- β on T cell-biology. A particular focus is proposed on **deciphering mechanisms of action of TGF- β in controlling gut inflammation associated cancer** using both *in vitro* *in vivo* models.

Lab publications related to the topic: Marie et al Immunity 2006, Doisne et al J. Exp. Med 2009, Ruiz et al Nature Com 2014, Worthington et al Immunity 2015. Mc Carron et al Nature Com. The selected candidate will join a dynamic research team composed of 12 people for a 2 year period potentially extended.
